

You have decided on a psychological hand analysis with me :D
Here is a little **simple guide** of what I need from you:

1. 1 photo on which the **correct proportions** can be seen on the basis of a ruler, the whole hand.

- Put your hand on the photocopier or scanner, cover it with a cloth. Make a black and white photocopy or scan.

2. 2 photos once of **the left** and once of **the right hand** on which the lines and characters are clearly and clearly visible.

- You can use your smartphone with the flashlight switched on

3. 10 photos of **each finger** or a picture of the paper of all the individual fingerprints on the

- You can take a photo of each individual fingerprint and label it precisely or insert impressions of each individual finger onto a sheet of paper using lipstick or an ink pad, as shown in the example below

➤ You can also photograph 4 fingers together for each hand, so that I can recognize the affiliation of each finger

	Daumen	Zeigefinger	Mittelfinger	Ringfinger	Kleiner Finger
Rechts

4. **Send** all images as PDF to hallo@karinmeulman.ch (e.g. via wetransfer.com)

IMPORTANT: It is very important for the hand analysis that it remains clearly recognizable to which finger the respective fingerprint belongs. Please make sure that there are no mix-ups. It is also important that all marks and lines are clearly visible in all images.

Thank you very much for your cooperation and I am very happy to be able to analyze your hand. Thank you for your trust.

Your Sinnfluencerin, Karin Meulman
